

# Well Engineering Graduate Training Program (1 of 2)

Our Well Engineering Graduate Training Program is designed for graduate engineers to develop their capabilities and experience in areas including Well Engineering, Well Barrier Management and Business Skills. We provide this training for graduate engineers from Operators, Regulators and Drilling Contractors and have successfully conducted training for the past 5 years for 11 [Inpex graduate engineers](#).

Trainees will be based in Singapore for the duration of the training (typically 4 months but can be adjusted based on client requirements) and shall receive on the job training and work alongside SW engineers on client projects. They will be assigned an engineering mentor and can expect exposure to our senior engineers, and benefit from over 30 years combined expertise in well engineering and design.

During the training, the SW team works closely with Graduate Engineers to ensure they achieve competencies in the following disciplines during the Well Engineering Graduate Training Program:

## **Well Engineering**

Well integrity

HPHT engineering

Well control engineering

Well engineering fundamentals

# Well Engineering Graduate Training Program (2 of 2)

## **Well Barrier Management**

Understand the importance of Corporate Barrier Policies and rules

Applying and ensuring compliance of barrier rules during Well Planning

Monitoring of well barriers while drilling to ensure continued safe operations

## **On the Job Project Experience**

Working on diverse client projects

Field experiences

## **Business Skills**

Working with internationally diverse team of engineers

Presentation of technical findings

Writing of technical reports
